Fluent

Bulgarian
Native

Interests

Music production

Ableton, FL Studio

Photo and Video editing

Photoshop, Premiere Pro

Game development

Unity, Blender

A skilled web developer with a deep interest in technology and design seeks to apply a rich background in multimedia and coding to innovative projects. Looking for an opportunity to bring meticulous attention to detail and problem-solving abilities to collaborative teams, aiming to make a meaningful impact on the industry.

Projects

IFDb

Database for movie enthusiasts

🔗 <https://github.com/SimeonTu/movie-app-client/>

- Developed the back-end for IFDb, a full-stack web app using the MERN/MEAN stacks. Implemented REST API for user interactions and secure data handling, complemented by comprehensive documentation.
- Mastered front-end development by building two dynamic SPA client-sides with React and Angular, applying industry-standard structuring, and real-time validation to enhance user experience.

Dev Events

Discover upcoming events in the development world

🔗 <https://github.com/SimeonTu/meet-app>

- Engineered a serverless PWA called Meet App with AWS Lambda, employing test-driven development and OAuth for Google Calendar integration, enhanced with a user-centric design featuring location-based event discovery.

Pokedex

Encyclopedia for Pokemon

🔗 <https://github.com/SimeonTu/pokedex-app>

- Developed a responsive website using JavaScript, jQuery, and Bootstrap, featuring detailed Pokémon data from an API, dynamic content manipulation, and asynchronous loading.

Education

CareerFoundry

Full-Stack Development

August 2023 - April 2024

Certificate

- Intense project-based training program focused on JavaScript, HTML, CSS and most prominent libraries, frameworks and tools.
- 500+ hours of hands-on training with guidance of industry leading tutor and mentor.

University of Greenwich

Computer Science

September 2018 - May 2022

Bachelor's

- Engaged in a comprehensive curriculum covering fundamental and advanced topics in computer science.
- Completed modules in Computer Architecture, Operating Systems, Cyber Security, AI, Python, Java, Human-Computer Interaction, Mathematics, Database Systems

Work Experience

Iron Mountain

Data Entry Clerk

October 2022 - December 2023

London, UK

- Consistently achieved set targets by effectively prioritizing tasks and managing time, ensuring deadlines were met without exception.
- Implemented innovative strategies to optimize and automate workflows.
- Expertly diagnosed and resolved complex technical issues.
